FOREWORD

It is important for a Higher Educational Institute to have clear defined Vision and Mission with a well developed Corporate Plan for its future plans and development. There is urgency in the drive to convert plans and proposals into concrete action to achieve objectives of the Corporate Plan.

This five year Corporate Plan of the Eastern University, Sri Lanka for the period 2009 – 2013 has been developed through extensive consultative process involving all academic and administrative staff of the University. The proposed many programmes in the first Corporate Plan covering the period 2003 - 2007 did not materialize due to the limitation and restriction in financial and human resources which were beyond the control of the University.

This Corporate Plan clearly outlines the University's strategic objectives in accordance with the Vision, Mission and goals of the University and describes the major programmes for the implementation during the period 2009 – 2013. This plan also contains time-bound action plan for each of the programmes and required financial and human resources if necessary for the successful implementation of the programme.

I with sincere gratitude acknowledge and appreciate the staff of the University who actively contributed to this efforts and I am confident that the University will take appropriate action to implement the programme set-out in the Corporate Plan during the proposed period.

Dr.N.Pathmanathan
Actg. Vice-Chancellor

VISION

Eastern University, Sri Lanka aims to be a national centre of excellence for higher learning and research with a competitive advantage, responsive to the dynamics of the regional and global conditions.

MISSION

The mission is to pursue excellence in teaching, research and dissemination of knowledge through enhancing the institutional capacity, human resource and infrastructure development and good governance to serve socio economic and cultural need of the community.

EASTERN UNIVERSITY, SRI LANKA

The Eastern University, Sri Lanka, was established on the 1st of October 1986 by a University Order dated 26th September 1986 issued under section 2 of the Universities Act No. 16 of 1978. The University was preceded by the Batticaloa University College established on 1st August 1981. The Batticaloa University College began with two Faculties, namely the Faculty of Science and the Faculty of Agriculture. Both these faculties were affiliated to the University of Peradeniya.

The University College was upgraded to the University status with the additional Faculties of Commerce and Management & Cultural Studies in October 1986. The Faculty of Cultural Studies was then expanded to include the Department of Languages, the Department of social Sciences and the Department of Geography and renamed the Faculty of Arts and Culture in 1991.

The Trincomalee Campus of the Eastern University was established with effect from 15th June 2001 by Gazette notification dated 6th June 2001 with the two Faculties, namely Faculty of Communication & Business Studies and Applied Science.

The Swamy Vipulananda College of Music and Dance was established in Batticaloa 1981 by the Ministry of Regional Affairs and Hindu Culture. However, in 1997 the Commission permitted the EUSL to enroll diploma holders of the SVCMD for a degree programme in the Department of Fine Arts.

In April 2001, the Hon. Minister of Cultural Affairs ceremonially handed over the SVCMD to the Ministry of Higher Education and Information Technology with a request that the name of the college continue to be used. Thereafter, on a directive given by Her Excellency the President and based on the report of a Committee, the Swami Vipulananda Institute of Aesthetic Studies, Eastern University, Sri Lanka was established by Ordinance NO. 01 of 2005 to be operative from 14th March 2005.

The new Faculty of Health-Care Science (FHCS) was established by Gazette notification on 23rd November 2004. It was envisaged that it would conduct not only the medical course but also courses for the paramedical sciences, nursing, physiotherapy, pharmacy, radiography and medical laboratory technology.

The organization structure of the University

The organization structure of the Eastern University, Sri Lanka (Figure 01) is similar to that of conventional universities. The post of the Chancellor is an honorary post while the Vice-Chancellor is the principal executive officer. The Registrar is responsible for the custody of the records and the property of the university and its general administration. The Officers of the University are the Vice-Chancellor, the Registrar, the Deans of Faculties, the Librarian and the Bursar.

At the apex is the Council of the University which is responsible for its overall management. This is chaired by the Vice –Chancellor The Council of the EUSL consists of ten EUSL members and eleven outside members appointed by the UGC from among persons who have rendered distinguished services in Educational Professional Commercial, Industrial, Scientific or Administrative spheres. The Council is responsible for the overall management of the university including its systemic efficacy effectiveness and quality. It is also the Council of the university that finally approves its Corporate Plan, Annual Report, and other major documents that deal with Administration and Management of the university.

The EUSL has its academic and administrative arms, which are responsible for quality management and administration The overall responsibility for “Quality Assurance” rests with the Senate of the university. As academic responsibilities are decentralized to the faculties, the Faculty Boards are operationally responsible and accountable for ensuring quality at the lowest levels. The EUSL has five faculties, each of which is headed by the Dean of the Faculty. Meanwhile the Registrar of the University manages administrative functions including Student Affairs, Finances, Examination and Human Resources.

Within this structure the faculties are conceived as the main building blocks of academic administration. Apart from the academic departments, there are other units that are under the guidance of the vice-Chancellor of the University. The overall quality of management of the EUSL is excessively dependent on the capacity and efficacy of the academic departments.

In attempting to meet the demands for universalisation of education, equality in educational opportunities and provision of lifelong education, EUSL offers many Programmes and courses. The programmes are conducted by the Five faculties viz through Departments of Study (Figure 01)

Infrastructure Facilities and Student Support

Study System

The university provides education facilities to all the internal students allocated and admitted by the UGC. The external degree programmes include specially designed printed lesson material for a self learner, discussion and classes, seminars, workshops, tutorial classes, laboratory and field work, e-mail and internet. The printed material offers the student the equivalent of lectures and tutorials. Students are provided with lesson material throughout the course.

Teaching also includes a system of continuous assessments, assignments, tests, project work etc. The assessments have a dual purpose viz. a tool as well as a means of helping the students to assess their own progress. Assignments are marked and returned to the student. The continuous assessment component also forms a part of the overall mark of the final examination.

Counseling of students in the appropriate selection of courses in selection of General/Special degree programme are provided by all faculties.

Programmes

The university has progressively increased the number of programmes offered at its inception to around 45. These programmes range from conventional, non-conventional, job oriented to continuing further education. The programmes are at Certificate, Diploma, Degree and Postgraduate level which provide an opportunity for entry at different levels.

Outreach

The university is located on 126 acres land at Vantharumoolai, Chenkalady. Academic and Administrative Secretariats have been established in the Old Complex area and the faculty complexes are proposed to be built in the New Complex area. All facilities to students and staff are arranged in the university complex areas.

Collaboration and Partnerships

The EUSL considers collaboration and partnership with other institutions to be of great importance in developing curricula for programmes of study, staff development as well as the development of infrastructure. The university collaborates with the conventional universities, research institutes, the corporate sector and NGOs. The EUSL has established strong links with several universities overseas, both conventional and open in India, Thailand and Norway.

Community services

The provision of educational facilities to students through external mode is in itself a huge community service. Students have the opportunity to learn English language and Information Technology. Another community service provided by the EUSL is to maintain model pre-schools in and around Batticaloa for the benefit of the children and people of the area. The CICT of EUSL is actively engaged in providing several community services.
